GAME 5

The Princess Blankets

Teamwork

Save the turtles! Turtles once lived in this area. When the seas were given to the princess, the turtles were reduced to one living, lonely turtle. Help her birth new turtles with the eggs you discover.

The Coral is dying! When the water was taken, the flowers of the sea had nothing to live in. Help the seas come alive and replenish the coastlines.

Fish, The fish are in need of life too. They need your help!

Dolphins, once upon a time, dolphins loved to swim alongside the boats. Can you help them have fun again and swim next to you?

Use your knowledge - by now you have bred bees and sheep. How might you and your team breed new species to help this environment?

Team-wise, two people maximum in the world. Minimum one researcher.

Global Citizen

Living sustainably: One of the key UN goals. How might you survive in this region and keep the fish stocks high? Screen shot this and add to your team's booklet.

Turtles live in peaceful and CLEAN environments. Using the apparatus available in the world, how can you clean the waters of debris?

Coral is vital for reefs to succeed and flourish - How can you use the game to demonstrate great regeneration for coral on your reef?

Dolphin intelligence - Use your knowledge of breeding and bring harmony to humans and dolphins. You will be rewarded with treasure.

LI & SC

Contributor, I can contribute constructively to project teams

Connector, I connect with learners from a variety of backgrounds and cultures

Collaborator, I can setup and learn within collaborative workspaces and worlds .

Collaborator, I can use collaborative technologies to work with others to create solutions

Global Citizen, I can explore local and global issues and use collaborative technologies.

Life!

Discovery

Turbo Charge

What happens when...
you feed dolphins cod?
Time is important Turtles only hatch at night.
There is dead and live coral. Feed the coral food and remove the rock hard coral.
